

■Rear Shock mounting Nut (stainless steel)

For Monkey/Gorilla • DAX50/70 • Super cub50/70/90 • Little cub • CD50/90 etc...

Since there is the problem of fast corrosion with the stock steel nut (plated), our company uses an outstandingly corrosion-proof stainless steel nut and washer. Also since the external shape is different from that of a stock nut, it gives the nut shape a sense of volume, enhancing the customized image when installed.

Kit include : Rear shock nut x4, washer x8 Half kit include : Rear shock nut x2, washer x4

※When tightening the rear shock nut, apply specified torques.

※When using DAX50/70, Super cub50/70/90, Little cub, CD50/90, since the plain washer installed on the top inner rear shock is 12mm, it is not possible to use the 10mm plain washer that comes with the kit, please use a stock washer.
